- Click Enter **or** "1" for Default

- Enter your Oracle user name and click Enter
- Enter your Oracle password and click Enter

- The following Main Menu screen returns:

- Click Enter **OR** "1" to choose "Alias Issue"

- Enter **ATM** in all caps (if not already chosen from using the scanner previously)
- To turn on all caps, press the following buttons:
  1. Press orange button
  2. Press "B"
  3. Press orange button
  4. Enter ATM

**NOTE: If you make a mistake, hit the Enter button and start over**

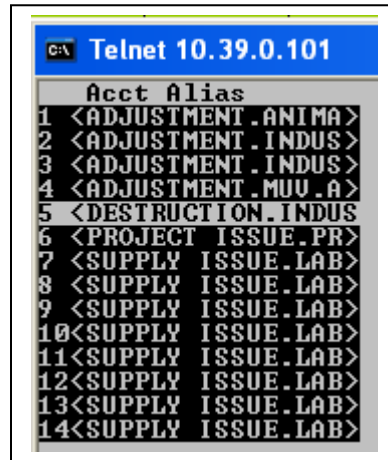

- Click Enter
- The Alias Issue Txn Screen returns

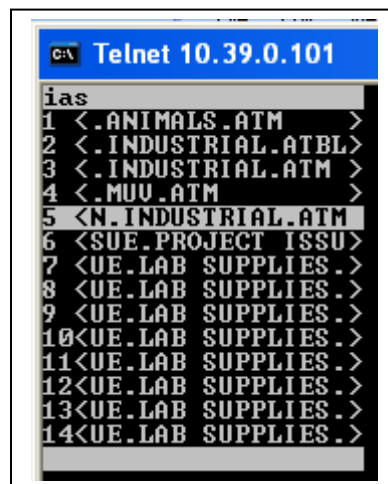

- Choose an "Acct" to be used for your transaction (i.e. DESTRUCTION.INDUSTRIAL.ATM, SUPPLY.ISSUE.LAB.SUPPLIES.ATM, etc.) from a list of values using the scanner keypad:
  1. Press green button
  2. Press "I"
  3. Press green button
  4. Press "L"

- The list of values will return:

**NOTE:** To see the full Account Alias, you will need to scroll to the right of the scanner screen. To do this:

1. Press orange button
2. Press "6"
3. Continue to press "6" to scroll to the right
4. With orange button still active, Press "4" to scroll back to the left
5. With orange button still active, Press "2" to scroll up
6. With orange button still active, Press "8" to scroll down

- Click the orange button to deactivate (the orange indicator light goes out at the bottom of the scanner)
- Click the number the corresponds to the account alias you choose

- Enter the item number using the scanner keypad or scanning an item number barcode

- The item description from Oracle is automatically populated
- With the scanner cursor on "Sub" for sub-inventory, scan the location label

- The sub-inventory and locator will populate on the screen
- The UOM is automatically populated
- The available quantity of this item in this sub-inventory and locator is automatically populated
- With the scanner cursor next to "Qty", enter the quantity for your transaction
- The quantity next to "Remaining" will automatically populate the same quantity as entered above.

- Click Enter
- Enter the lot number using the scanner keypad or scanning a lot number barcode
- With the cursor next to "Lot Qty", enter the exact same quantity as entered next to "Qty"
- The scanner cursor will stop next to "Reason". This is an unused field; click Enter

```

C:\ Telnet 10.39.0.101
Alias Issue Txn(ATM)
Acct      >DESTRUCTIO
Item      >207067
Desc      :BAGS, SAMP
Sub       >WHS
Loc       1410.B12B..
UOM       >EA<1 EA>
Avail Qty:180
Qty       :1
Remaining:0
<View Lot Attr>
Reason    >
Reason Co>
<Save/Next>
<Done>
47433-0000 Processed

```

**NOTE:** If the chosen Account Alias has a mandatory reason code associated with it, there will be a place holder called "Reason Code" that will that will be present and must have a value entered

- With the scanner cursor next to "Reason Code", either key in the value using the scanner key pad or pull up the list of values for this field:

```

C:\ Telnet 10.39.0.101
Alias Issue Txn(ATM)
Acct      >DESTRUCTIO
Item      >207067
Desc      :BAGS, SAMP
Sub       >WHS
Loc       1410.B12B..
UOM       >EA<1 EA>
Avail Qty:180
Qty       :1
Remaining:0
<View Lot Attr>
Reason    >
Reason Co>
<Save/Next>
<Done>
47433-0000 Processed

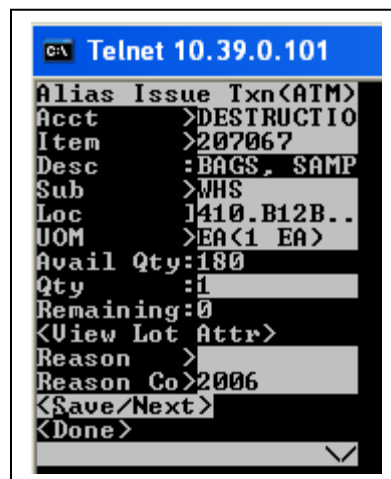

```

1. Press green button
2. Press "I"
3. Press green button
4. Press "L"

- The list of values will return:

- Click the number next to the Reason Code desired
- The Reason Code is populated on the screen

- Click Enter to complete the transaction
- The message "Txn Success" will return to let the user know the transaction was completed.

**NOTE:** The transaction is not complete unless the user clicks Enter where <Save/Next> is the choice.

- To exit this screen, click F2

A screenshot of a Telnet session window titled "C:\ Telnet 10.39.0.101". The window displays a transaction form with the following fields and values:

Alias	Issue	Txn(ATM)
Acct	>	DESTRUCTIO
Item	>	
Desc	:	
Sub	>	
UOM	>	
Avail Qty:		
Qty	:	
Remaining:		
Reason	>	
<Save/Next>		
<Done>		
<Cancel>		
Go to menu?(y/n):		

- The question "Go to menu? (y/n)" will return
- Click "Y" button
- The main menu returns

A screenshot of a Telnet session window titled "C:\ Telnet 10.39.0.101". The window displays a main menu with the following options:

Merial	MSCA	US	RMS
1	<	Inventory	Issue
2	<	Inventory	Transfe
3	<	Inventory	Receipt
4	<	Labels	
5	<	Inquiry	
6	<	Change	Responsibi
7	<	Logout
